

### **PhD Projects Commencing 2008**

The Centre for Animal Biotechnology (CAB), at the University of Melbourne welcomes students who want to commence PhD projects in the following areas:

- *Regulation of cell trafficking in lymph*
- *Local immune responses to vaccines*
- *Functional and structural relationships of the peripheral airways in chronic asthma*
- *Exploring the pathogenicity of Helicobacter infection of native Australian wildlife*
- *Functional genomics in schistosomes*

Further information on the projects and contact details of supervisors can be obtained from the CAB website: [www.cab.unimelb.edu.au](http://www.cab.unimelb.edu.au)

Applicants with First or Upper Second class honours degrees are encouraged to apply for scholarships through APA and the Faculty (\$18-25K/annum).

Applications for scholarships need to be submitted by 24<sup>th</sup> August 2007 for International students and 24<sup>th</sup> October 2007 for Australian citizens or permanent residents.

For more details and information on scholarships, please contact:
