

The 2007 Veterinary Pre-Clinical Centre Seminar Series

Seminars are held at 1.00pm in the 2nd floor lecture theatre Veterinary Science Building

Date	Hosting Group	Speaker	Topic
1 st February	CAB	Stacey Harbour	Investigating immunoregulation of Helicobacter-induced gastritis
8 th February	Mackie	Smitha Georgy	The Role of Protease Activated Receptor 2 in the Regulation of Bone Cell Functions
15 th February	Browning	Gary Muscatello	Epidemiology of <i>Rhodococcus equi</i> pneumonia: At last – the truth about ‘Rattles’ in horses
22 nd February	External (Mackie)	Susie Nilsson	The Yin and Yang of hemopoietic stem cell regulation by its niche
1 st March	CAB	Bernd Kalinna	Novel approaches for the transfection of human bloodflukes'
8 th March	Mackie	Jin Yoo	The effect of thrombin and prostaglandins on muscle regeneration
15 th March	Browning	Yoshihiro Muneta	Study of pathogenesis of mycoplasma and its application to mucosal vaccine
22 nd March	Maddox	Jill Maddox	Genome mapping and genomics resources for sheep
29 th March	CAB	Hung-Hsun Yen	Setting and resetting immune memory
5 th April	Mackie	Simon Bailey	Bacterial trigger factors causing equine laminitis
12 th April	Browning	Cancelled	Cancelled
19 th April	External (CAB)	Andrew Hill	From mad cows to infectious nanovesicles - the life story of a prion
26 th April	CAB	Jean-Pierre Scheerlinck	The Good, the Bad and the Ugly: Adjuvants for effective vaccination
3 rd May	Mackie	Kitipong Uaesoontrachoon	Osteopontin and skeletal muscle myoblasts: Expression and function
10 th May	Browning	Marc Marena	Tiny, nasty and sex crazed: lessons from the genome sequence of <i>Mycoplasma agalactiae</i>
17 th May	External (CAB)	Els Meeusen	From Parasites to Pregnancy and Asthma: Immunological connections
24 th May	CAB	Phil Sutton	Helicobacter infections of humans and other (more important) animals
31 st May	Mackie	Lopeti Lavulo	An <i>in vitro</i> approach to understanding the molecular mechanism of Callipyge muscle hypertrophy
7 th June	Browning	Colin Wilks	Applying veterinary science in less developed countries
14 th June	External (CAB)	Stewart Nuttall	Shark IgNAR antibodies: Immunoglobulin architectures from the deep
21 st June	CAB	Alison Every	Muc1 mucin limits <i>Helicobacter pylori</i> infection and the associated gastritis
28 th June	Mackie	Jason White	Myostatin mutations and the Australian Sheep Industry
5 th July	Browning	Carol Hartley	Glycoprotein G; a critical factor in herpesvirus virulence?"
12 th July	Cahill/Kimpton	Wayne Kimpton	Lymphopoiesis in the foetus and neonate
19 th July	CAB	Stuart Barber	The Australian Sheep Industry and mastitis
26 th July	Mackie	Michiko Mirams	Altered gene expression in early lesions of equine osteochondrosis
2 nd August	Browning	Phil Markham	
9 th August	External (Mackie)	Natalie Sims	
16 th August	CAB	Janet Wee	
23 rd August	Mackie	Dharshi Siva	
30 th August	Browning	Amir Noormohammadi	
6 th September	External (Mackie)	Gordon Lynch	
13 th September	CAB	Ken Snibson	
20 th September	Mackie	Lay Hoon Loh	
27 th September	Browning	Michael Studdert	
4 th October	External (Browning)	Dieter Bulach	<i>Leptospira</i> Genomics

11 th October	CAB	Caroline Skene	
18 th October	Mackie	Jason Chen	
25 th October	Browning	James Gilkerson	
1 st November	External (Browning)	Heidi Drummer	Structure and Function of the Hepatitis C Virus glycoproteins in viral entry
8 th November	CAB	Deanne Greenwood	
15 th November	Mackie	Helen Davies	
22 nd November	Browning	Joanne Devlin	
29 th November	External (Browning)	Julian Rood	
6 th December	CAB	Emmanuel Koumoundouros	
13 th December	Mackie	Chris Gorman	
20 th December	Browning	Sally Symes	Chicken chemokines
Christmas
